PCT/IL03/00733

V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. STATEMENT

Novelty (N)	Claims <u>1-19</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-19</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-19</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-19 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a plurality of connector mounting holes and a working liquid supply arrangement including a plurality of working liquid release channels for directing working liquid to regions adjacent to the connector mounting holes, at least one of the release channels being interspaced between a plurality of mounting holes. For example, the closest prior art, Saitoh et al, does not teach the holder having a plurality of mounting holes, and any liquid release channels are formed in the polishing tool, not the fixture.

Claims 1-19 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
